

FRIENDLY FINCH • LAUNCH PROPOSAL

Great deals. Better brands. **Live for the New Year.**

Soft launch on December 14, then your 90-day validation from January 4, on one app you own, with your favorite tools plugged in. **One fixed price, start to launch.**

PREPARED FOR

David Meyers & Francene

PREPARED BY

DATE

September 2026

WHERE WE ARE

We're already past the starting line.

Discovery is largely done, at no charge. The first week of Phase 1 confirms the last details against your documents.

The Problem

Thousands of great small brands can't get seen, and the deal sites that could help them aren't built for them.

Small brands are invisible

They sell direct-to-consumer, can't afford trade shows, and are years away from Whole Foods.

Deal sites chase the big guys

Affiliate models reward Amazon and Target. A young brand is never worth their time.

Shoppers are overwhelmed

Hundreds of offers a day. Nothing feels curated, so nothing feels special.

“ It's curated. We're deciding.

CURATION IS THE PRODUCT

“ Just like a newspaper ad. You want to do this, this is the price.

FLAT FEE • NO SALES TRACKING

“ As simple as possible on everybody.

THE DESIGN RULE

Discover It. Submit It. Schedule It.

Think AppSumo for small consumer brands: a curated, insider feel, like a magazine, not a coupon pile. Members discover, brands submit, and you schedule. Here's one Dr. Bronner's promotion from start to finish.

Members Brands You

Your look, from friendlyfinch.com, turned into the real thing.

Your logo, colors, fonts, teal headlines and amber buttons, carried into the product.

Members browse the day's finds, tap into a brand, and shop on its own site. *(Illustrative; final screens designed with you in the first week.)*

FEATURE • BRAND PARTNERS

High-touch for brands, without the email chase.

You still approve every brand personally. After that, everything flows through one private portal, and every campaign ends with a report that brings the brand back.

PHASE 1 • WHAT YOU GET

Everything you need to **launch and run your 90-day test.**

Your MVP scope: a public Member site, a separate secure Brand Partner site, and your admin, sized for about 24 promotions a week.

Members

- Curated deals and brand pages, no login needed
- Giveaways and promo codes, then shop on the brand's site
- Signup with separate Friendly Finch and brand consents
- Morning email with members-only deals

Brand Partners

- Apply, get approved, then submit on a secure site
- Upload checks and a preview of their page
- Status emails and a report after every campaign
- Payment link with each approval

Your admin

- Review, approve and schedule all five services
- Deals publish and expire on their own
- Consent log and secure data hand-off
- Launch metrics, backups, runbook and training

CUSTOM CORE

Member site, Brand Partner site and admin in one web app. The code is yours.

YOUR TOOLS, PLUGGED IN

ViralSweep, Zoho CRM Professional, your email platform, payment links.

LATER, IF YOU WANT

Member accounts, search, dashboards, API integrations.

Full recommendation, with the reasons for each choice, in Appendix A.

TIMELINE

Soft launch December 14. Validation from January 4.

About 9 weeks to launch, against the 9–12 months you'd originally planned, without cutting the scope you approved.

What we'll watch

Member signups, alert choices, email opens and clicks, clicks per brand, giveaway entries, brands booking again.

What I need from you

Your approved workflows and tool access at kickoff, and quick decisions when questions come up.

Included after launch

30 days of stabilization, plus the three readout calls, at no extra cost.

INVESTMENT

Two phases. One fixed price to launch.

Discovery is done, at no charge. Phase 1 gets you live in about 9 weeks, not the 9–12 months you'd planned. Phase 2 is there when you like what you see.

PHASE 1 • LAUNCH

\$20,000 fixed

Everything in the Phase 1 scope: Member site, Brand Partner site and admin, your tools plugged in by embed, testing, training, handoff, 30 days of fixes after launch, and three readout calls.

\$10,000

when we start
Oct 12

\$10,000

when it's launch-ready
Dec 18

PHASE 2 • WHEN YOU'RE READY

Pick what you want

Advanced features once Phase 1 is live and you've seen the results:

Giveaways by API: one-tap entry, bonus entries	≈ \$3,000
Member-chosen email alerts	≈ \$1,500
Two-way Zoho sync	≈ \$1,200
Automatic invoicing	≈ \$1,000
Brand dashboard, member reviews, more	Quoted

✓ Fixed price: overruns are on me

✓ Half now, half when it's launch-ready

✓ The code is yours

✓ Phase 2 only if you want it

Running costs (paid directly to each provider, no markup): about \$100–240/mo for hosting, your giveaway and email tools, and your existing Zoho plan. **Support after the first 30 days** is optional: \$450/mo or \$120/hr, no minimum.

RELEVANT EXPERIENCE • REFERENCES • WORKING TOGETHER

One owner who builds it, launches it, and still answers the phone.

~90

Dent Experts

Web app for hail-repair field inspections, connected to their CRM (GoHighLevel) and Airtable. Customer documents signed through it in the last 30 days.

9,000+

Health for California

Consumer-facing review pages with automated follow-up and reporting, all tied into their existing tools.

200+

Nuvolum

Client sites shipped from one repeatable template, the same idea as your brand pages.

JH

Judah Howe • Owner, Dent Experts

Client reference. Can speak to a web app I scoped, built and still support, connected to his CRM and used by his team every day.

TH

Tom Hakel • Executive reference

Worked with me since 2019. Can speak to how I scope, price and deliver, and how I treat the people I work with.

Working with me

- Clear, plain-language communication
- You plan directly with the person building it
- I stand behind my work: if something I built breaks, I fix it
- Local, U.S.-based, and here long after launch
- Predictable, straightforward pricing

Let's Build.

Friendly Finch, live for the New Year: curated deals from brands doing good things, in front of members who asked for them.

Say "go" by **Friday, October 9** and Phase 1 starts **Monday, October 12**. By October 16 you'll see a clickable prototype.

1

Reply "go"

I sign your confidentiality agreement and send the Phase 1 agreement.

2

Kickoff • Oct 12

60 minutes with you both. Share your approved docs and tool access.

3

Prototype • Oct 16

A clickable prototype of your product to react to, plus hands-on checks of each tool.

APPENDIX A • MY RECOMMENDATION • BUY • CONFIGURE • INTEGRATE • CUSTOM • DEFER

Use your tools where they fit. Build only the core that ties them together.

CAPABILITY	RECOMMENDATION	WHY
Member site + brand pages	CUSTOM	Auto publish/expire, consent capture and the brand-page template are the core of your product. On Wix they'd need Wix-only code that can't be moved, which works against your portability principle.
Brand Partner site + admin	CUSTOM same app	Secure logins where brands see only their own data, upload checks, and a review, schedule and exceptions workflow in one place.
Giveaways	BUY + INTEGRATE	ViralSweep, as you planned. Its embed goes on each brand page; the API waits for Phase 2.
Brand Partner CRM	BUY + INTEGRATE	Zoho CRM Professional, as you planned. Applications land there and in Francene's inbox.
Email marketing	BUY + CONFIGURE	A standard email platform. Its signup form, plus a morning email sent automatically from the app's daily deal feed.
Brand fees	BUY	Payment links from a standard processor. No checkout to build.
Measurement (TBD in your doc)	CONFIGURE	Privacy-friendly analytics plus the app's own click tracking, feeding your emailed reports.
Later	DEFER	Member accounts, search, personalization, partner dashboard, API integrations, downloadable apps.

Technical approach: standard, widely used open-source web technology; a managed database and hosting; role-based access so brands see only their data; daily backups; all code in your repository with documentation, so any independent reviewer or developer can pick it up. An initial recommendation, not a prescribed stack: we confirm each line together in the first week, and every third-party tool or license is disclosed before you commit.

APPENDIX B • INTEGRATIONS • NOW VS. LATER

Phase 1: paste them in. Phase 2: connect by API once the test proves it.

I dug into each tool's API so you know exactly what integrating would unlock, and what it would cost, before you spend a dollar on it.

TOOL	PHASE 1 • COPY-AND-PASTE (INCLUDED)	PHASE 2 • API INTEGRATION UNLOCKS	ADDED COST
Giveaways ViralSweep	Each giveaway's widget pasted onto its brand page, styled to match your look.	One-tap entry across every giveaway · bonus entries when members visit a brand or join its list · entry counts in brand reports · automatic winner banners. <i>Giveaways are still created in ViralSweep; its API can't create them.</i>	≈ \$3,000 build + plan upgrade ≈ \$170–200/mo (API is a top-tier feature, switched on by their support)
Email	Signup form with alert choices; the morning email sends itself from the app's daily deal feed.	Alerts tailored to each member's categories · last-chance reminders timed to each deal's end.	≈ \$1,500 build usually no plan change
CRM Zoho	Application form drops each brand straight into Zoho and Francene's inbox.	Two-way sync of brands, bookings and campaign results.	≈ \$1,200 build no plan change (Zoho CRM Professional includes API access)
Payments	A payment link sent with each approval.	Invoices created and tracked automatically per booking.	≈ \$1,000 build

Phase 2 figures are estimates to plan around, confirmed after your April readout. Giveaways also carry the biggest monthly jump, so we'll only move to the API if entries prove it pays.

APPENDIX C • ASSUMPTIONS • RISKS • CHANGE CONTROL

No surprises: what the price assumes, and how changes work.

Key assumptions

- Scope follows your MVP Definition Register, workflows and Service Bundle Catalog
- About 24 promotions a week at launch; brands supply content through their site
- Business decisions within 2 business days; one design round plus one revision
- US members, English only

Not in Phase 1

- Checkout, sales tracking or affiliate links
- Member logins, search, personalization, partner dashboard
- API integrations (Phase 2 menu) and downloadable apps
- Copywriting, photography, legal review, tool subscriptions

What could move the price

- **Up:** API integrations, automated invoicing, a partner dashboard, extra services or brand-page templates, extra design rounds, data migration
- **Down:** fewer services at launch, manual report sends, starting with fewer promotions a week

Change control after approval

- Any change gets a one-page written request: what, why, cost and schedule impact
- Nothing proceeds until you approve it in writing
- Tweaks under an hour are absorbed, not billed
- Phase 2 items are quoted separately after your April readout

Top risks, and how I handle them

- **Brand content arrives late:** upload checks and a simple content checklist per brand
- **Email lands in spam:** sender authentication set up and warmed before launch
- **Giveaway embed limits:** tested hands-on in week one
- **Holiday timing:** soft launch Dec 14 with three friendly brands; full launch waits for Jan 4

APPENDIX D • YOUR BRIEF, ANSWERED

Everything you asked a partner to include, point by point.

YOU ASKED FOR	MY ANSWER
Named lead, team, locations, roles	✓ Gera Yeremin, senior product and delivery lead who also builds it. Based in Sonoma County, CA. No offshore or subcontracted work.
Discovery approach, fee, timetable, deliverables	✓ Largely done in this proposal, at no charge: recommendations, risks, data flows, price. Week one of Phase 1 confirms the details against your documents and delivers a clickable prototype.
Buy / configure / integrate / custom / defer	✓ Appendix A. No prescribed stack; confirmed together in week one.
Build range, milestones, assumptions, exclusions, change control	✓ \$20,000 fixed for Phase 1, paid in two parts: \$10,000 at start, \$10,000 when launch-ready. Assumptions, exclusions and change control in the appendix.
Material cost drivers	✓ In the appendix, both up and down, with the top risks.
Approval gate	✓ Nothing starts until you approve the Phase 1 scope in writing. Phase 2 is a separate decision after you've seen Phase 1 working.
Ownership + handoff	✓ Code, repository, data, designs, configurations and documentation are Friendly Finch's from day one. Handoff session and runbook included. Third-party tools disclosed before you commit.
Independent technical review	✓ Welcome at vendor selection, before build approval and before launch.
Post-launch support model	✓ Defects in delivered scope fixed free for 30 days. Optional Validation Care at \$450/mo, no minimum commitment , cancel anytime. Ad hoc at \$120/hr. Enhancements quoted as fixed mini-scopes.
