

FRIENDLY FINCH • REVISED PROPOSAL

Curated brands. Real revenue. **One step at a time.**

Revised for your updated MVP: the Brand Directory, flat-fee promotions and giveaways, and the automation to run them. Start with a two-week Discovery, then approve the build when the numbers make sense. **A fixed fee now, a fixed price before you commit.**

PREPARED FOR

David Meyers & Francene DuPre

REVISED

September 30, 2026

WHAT WE HEARD

You updated the scope. Here is our answer.

Thank you for the care in your updated documents. Three changes matter most, and your documents also ask for a technical review before any build spend. The plan is built around all of it.

A public Brand Directory, paid by commission

You said: Members browse affiliate-ready brands and Friendly Finch earns a commission. Promotions and giveaways stay flat-fee.

The plan: a link-out model. A tracked link per brand, a click log and monthly reconciliation. No checkout and no purchase tracking.

Brand Partners inside FriendlyFinch.com

You said: no separate Brand Partner site, just one "Brand Partner Login" and no full portal at launch.

The plan: brands sign in from your site and stay in your look. A simple submission area, reviewed and published only by you.

Automation and AI, when they pay off

You said: vetting, the promotion lifecycle, Directory upkeep and commission tracking will not scale by hand.

The plan: a roadmap in Discovery. Each automation is built when your volume earns it, and you approve every AI decision.

1

Discovery

2 weeks · \$3,500 fixed

2

Build

Fixed price, set after Discovery

3

Automate and scale

When your volume earns it

Your brief asks for a fixed-fee Discovery, an indicative build range, and your own written approval before anything is built. This is that structure.

Discover It. Submit It. Schedule It.

A curated, insider feel, like a magazine, not a coupon pile. Brands reach your Members two ways, and you stay in charge of both.

AFFILIATE COMMISSION

The Brand Directory • always on

Curated brands by category, each with a tested tracked link. Members click through and buy on the brand's own site. The brand's affiliate platform pays you commission on qualifying purchases.

FLAT FEE

Promotions and Giveaways • limited time

You schedule each one for a set period. Free during validation, then your catalog prices apply: \$1,500 for a promotion and \$2,000 for a giveaway, with no commission on top.

BRAND

Applies

A short application. It lands in Francene's inbox and in Zoho.

FRANCENE

Approves

Against your Brand Standards. The brand gets a login.

BRAND

Submits

Profile, images, offer and, for the Directory, its tracked link. Checked on the spot.

YOU

Review and schedule

Check the link and offer, then publish. Brands never self-publish.

PLATFORM

Goes live

It publishes and expires on time. Every Directory click is logged.

YOU

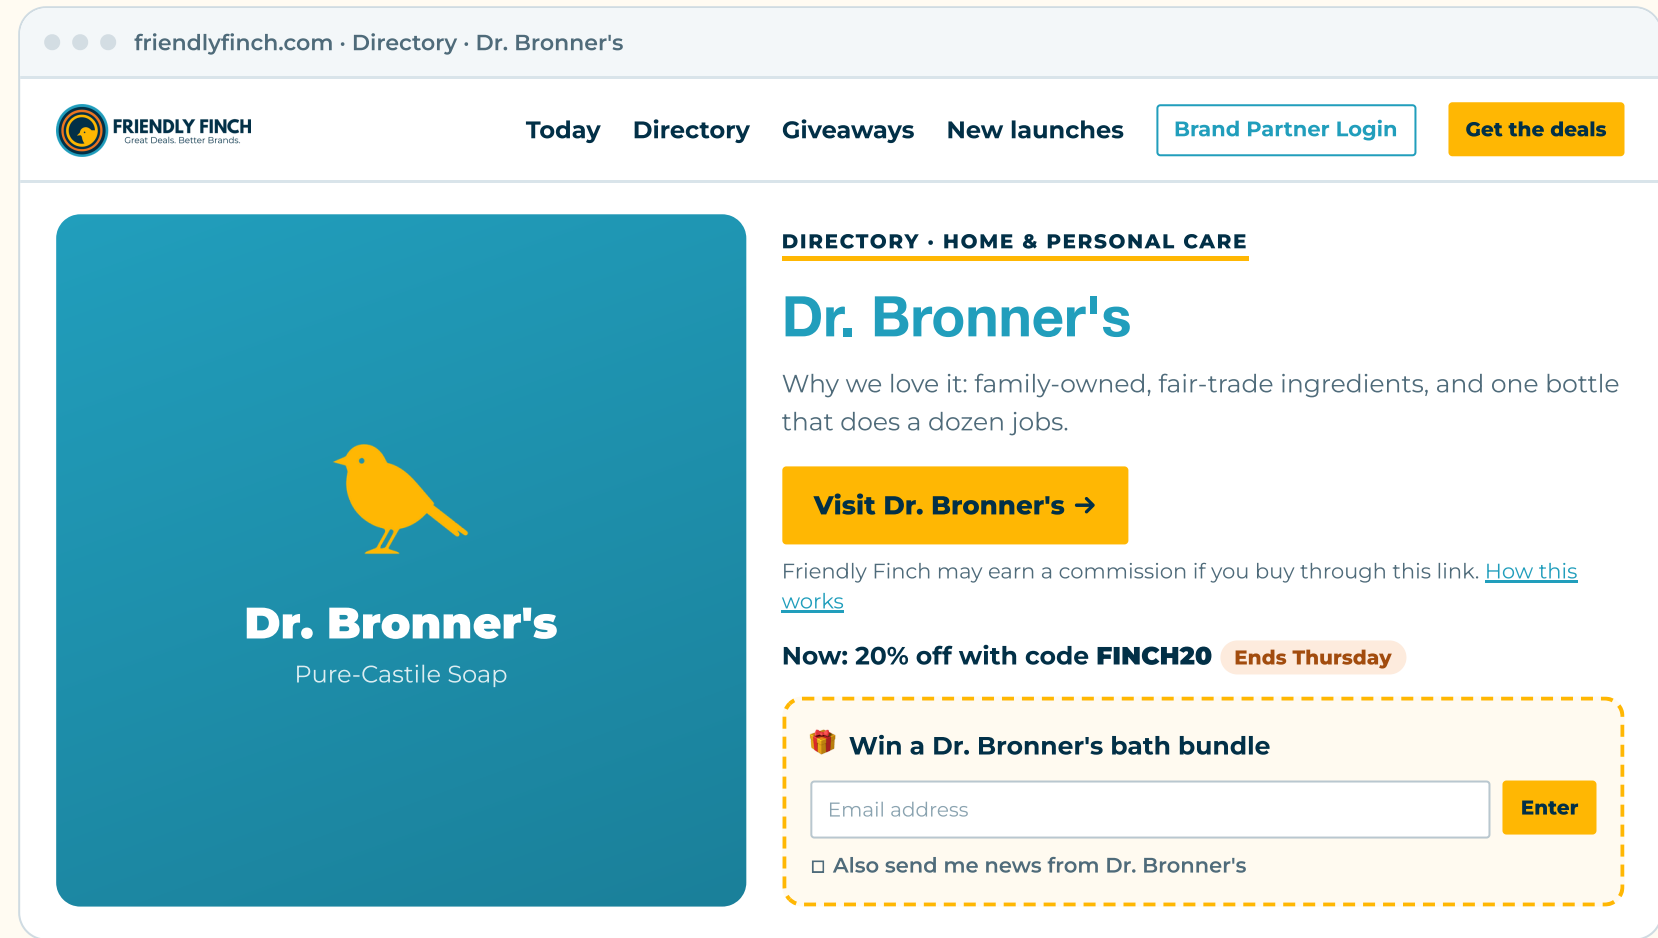

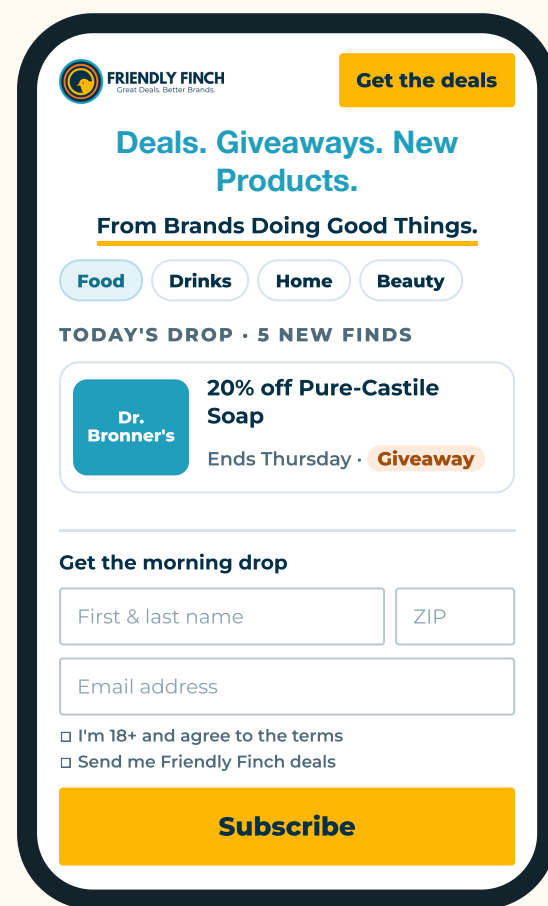

Report and reconcile

Brands get an emailed report. You reconcile commissions monthly.

WHAT IT LOOKS LIKE

Your look, from friendlyfinch.com, turned into the real thing.

Your logo, colors, fonts, teal headlines and amber buttons, carried into the product. Members browse the Directory and the day's finds with no login, tap into a brand, and shop on its own site. *(Illustrative.)*

FEATURE • BRAND PARTNERS

High-touch for brands, without the email chase.

You still approve every brand personally. After that, brands use a simple, secure area inside FriendlyFinch.com, reached from one "Brand Partner Login" button. Every promotion ends with an emailed report that brings the brand back.

● ● ● FriendlyFinch.com • Brand Partner area

Signed in 2-step verification on

*Members who opted in to hear from the brand. Entries come from your giveaway tool. Promotion measures only: Friendly Finch does not track purchases.

Book your next promotion →

You link out. The brand's platform tracks and pays. You reconcile.

A light model by design: no checkout, no cross-site tracking, no chasing payments. It follows your FF-008 specification.

- 1 The brand is affiliate-ready.** It has an affiliate program, meets your minimum commission and issues a unique Friendly Finch link.
- 2 You verify before it goes live.** Link tested, disclosure in place, and the terms recorded: rate, window and payment timing.
- 3 A Member clicks through.** The tracked link sits behind the button, beside a clear commission disclosure. Every click is logged.
- 4 The brand's platform does the rest.** It attributes the purchase, handles returns, then approves and pays the commission.
- 5 You reconcile monthly.** Import each platform's statement, match it to clicks and payments, and log any exceptions.

FRIENDLY FINCH

Directory pages, the tracked link behind each button, the click log, the disclosure and the monthly reconciliation.

THE BRAND'S AFFILIATE PLATFORM

Attribution, conversions, returns, commission approval and payment. It stays the source of truth.

NOT AT LAUNCH

Checkout, your own purchase tracking, multi-network integrations, automated payout routing.

Admin • Brand Directory

Sample Soap Co. • readiness

SAMPLE DATA

✓ Affiliate program

✓ Unique link tested

✓ Minimum commission met

✓ Disclosure shown

Monthly reconciliation

Import statement (CSV)

BRAND	CLICKS	PENDING	APPROVED	PAID
Sample Soap Co.	1,240	\$312	\$188	\$140
Sample Snacks Co.	860	\$95	\$210	\$210
Sample Tea Co.	455	\$0	\$64	\$0 ▴

▴ Approved but not yet paid: flagged for follow-up.

A healthy click rate does not prove commission revenue. Monthly reconciliation is how your validation learns whether the Directory really earns.

STEP 1 • DISCOVERY

Two weeks to settle your seven open decisions, before you spend on a build.

Your MVP Build Brief (FF-007 §7) asks a Technical Advisor to settle seven open decisions before any vendor commitment. I do that work in a fixed two-week Discovery, written so your Technical Advisor can review, challenge and keep it.

YOUR OPEN DECISION	WHAT YOU'LL HAVE ON OCTOBER 23
1 Consent recognition without a Member login	A tested method, and what happens when a lookup fails
2 Secure Brand Partner data delivery	A secure transfer method and the evidence to keep
3 Reporting and measurement feasibility	Each launch metric tied to its source, plus the Directory click and commission-reconciliation process
4 Architecture and integration boundaries	A one-page system and data-flow map, and the result of the Wix test
5 Launch payment method	The simplest approach with Xero and Zoho, with no custom billing
6 Privacy, security, retention and access	Every control marked native, configured or custom
7 Build versus buy roadmap	What to configure, integrate, do by hand, defer or build, with cost, risk and upkeep

Also in the package

- ✓ Answers to the follow-up questions in your MVP register
- ✓ An automation and AI roadmap for your four bottlenecks
- ✓ A clickable prototype of the Member and Brand Partner screens, in your brand
- ✓ A fixed build price and a two-payment milestone plan

\$3,500 fixed

Half at the start, half on delivery. The package is yours to keep, whoever builds it.

Already done, at no charge: all six documents read and mapped, first-pass answers to all seven decisions, and API research on ViralSweep, Zoho and email.

STEP 1 • HOW WE'LL DECIDE

Wix, custom, or both? A short test decides, not an opinion.

Your documents approve Wix for FriendlyFinch.com, and it is a good home for most of your public pages. Three of your own requirements are where any site builder is most likely to need help. In the first week of Discovery I test each one hands-on.

Secure brand logins

You require MFA (FF-004-019). Wix offers 2-step verification for owners and collaborators, but not built in for site members, so brand logins need extra code.

The test: build a brand login with 2-step verification and see whether it holds up.

Publish and expire on time

You asked whether Wix can reliably schedule each complete cycle (FF-004-009). Its scheduled jobs run hourly at best, and Stage C is 24 promotions every 24 hours.

The test: simulate Stage C, with retries and alerts, and watch for misses.

One record of consent, no login

Consent lives across Wix, your email platform, ViralSweep and Zoho (FF-004-014 to 016), and you need to check it without a Member login.

The test: check one Member's consent across all four and see whether a single record can be trusted.

ALL THREE PASS

Wix carries it

Lowest price. I configure Wix and connect your tools.

MY STARTING EXPECTATION

SOME FAIL

Hybrid

Wix keeps your public pages. I build only what failed, as a small app in your look. Brands still click one Brand Partner Login.

MOST FAIL

Custom core

One app for the Directory, Brand Partner area and admin, with your Wix site linking to it.

If Wix passes, I will say so and the price drops. Either way you get the evidence, and the choice is yours. Wix generally serves a whole domain, so a second app lives on a subdomain of your site, for example partners.friendlyfinch.com, styled to match.

Sources: Wix Help Center (2-step verification for site members) and Wix Velo documentation (scheduled jobs). Checked September 30, 2026.

STEP 3 • AUTOMATE AND SCALE

Automate what volume proves is worth it. **Approve every AI decision.**

You named four bottlenecks. Discovery maps each one, and each automation is built only when your numbers earn it, as your own FF-004-029 says. Nothing publishes, approves or pays without a person.

BOTTLENECK	WHAT GETS AUTOMATED	SUGGESTED TRIGGER
Brand vetting and onboarding	AI reads each applicant's public website and social presence and drafts a one-page brief scored against your Brand Standards. You decide.	Applications outgrow Francene's review time
Promotion and giveaway lifecycle	Automatic pre-checks before you review: image specs, required fields, prohibited claims and link tests. Reminders, go-live and closeout run on their own.	Stage B volume, 20 a week
Directory upkeep	A nightly check of every tracked link and its affiliate terms, with an alert when a link breaks or terms change.	About 25 Directory brands
Commission tracking and payment	Each platform's statement parsed and matched to clicks and payments, with variances flagged for you.	Reconciliation takes more than a couple of hours a month

- ✓ A person approves every AI step
- ✓ Built only when volume earns it
- ✓ Every decision logged for audit
- ✓ Each module ≈ \$1,000–2,500

Triggers are my suggestions; we set yours in Discovery. Each module is quoted as its own fixed mini-scope.

TIMELINE

Discovery in October. Soft launch in late January.

Dates assume you say "go" by October 9 and approve the build by November 6. Each week of delay moves the launch a week. If Wix passes the test, launch moves up two to three weeks.

What we'll watch

Your success measures: 5–10 paying Brand Partners and 5,000+ registered users, plus Directory clicks, commissions reconciled against clicks, and brands booking again.

What I need from you

Your documents and tool access at kickoff, quick decisions when questions come up, and your written approval before the build.

Included after launch

30 days of fixes, plus the three readout calls, at no extra cost.

INVESTMENT

Start with a \$3,500 Discovery. Fixed price before you commit to the build.

Your brief asks for a fixed Discovery fee and an indicative build range. Here are both. Your scope grew (the Directory, the affiliate module, stronger security), so the range starts near my first price and depends on what the test shows.

STEP 1 • DISCOVERY

\$3,500 fixed

Two weeks: your seven decisions, the Wix test, the system map, an automation roadmap, a clickable prototype and a fixed build price.

The package is yours to keep, whoever builds it.

\$1,750

at the start
Oct 12

\$1,750

on delivery
Oct 23

STEP 2 • BUILD

\$22K–\$30K indicative

Your launch scope with your tools plugged in. One fixed price after Discovery, with 30 days of fixes and three readout calls included.

50%

at build start

50%

when launch-ready

STEP 3 • AUTOMATE AND SCALE

Pick what you want

Only when you have seen the results:

Giveaways by API	≈ \$3,000
AI modules, each	≈ \$1,000–2,500
Two-way Zoho sync	≈ \$1,200
Xero invoicing automation	≈ \$1,000
Member-chosen email alerts	≈ \$1,500
Brand dashboard, reviews	Quoted

✓ Fixed price: overruns are on me

✓ Nothing starts without your written approval

✓ The code is yours

✓ Discovery is yours to keep

Running costs (paid directly to each provider, no markup): about \$100–240/mo for hosting and your giveaway and email tools; the giveaway API, if you need it, adds about \$170–200/mo. Support after the first 30 days is optional: \$450/mo or \$120/hr, no minimum. Budget set? Tell me your number and I will show you exactly what fits.

RELEVANT EXPERIENCE • REFERENCES • WORKING TOGETHER

One owner who builds it, launches it, and still answers the phone.

~90

Dent Experts

Web app for hail-repair field inspections, connected to their CRM (GoHighLevel) and Airtable. Customer documents signed through it in the last 30 days.

9,000+

Health for California

Consumer-facing review pages with automated follow-up and reporting, all tied into their existing tools.

200+

Nuvolum

Client sites shipped from one repeatable template, the same idea as your brand pages.

JH

Judah Howe • Owner, Dent Experts

Client reference. Can speak to a web app I scoped, built and still support, connected to his CRM and used by his team every day.

TH

Tom Hakel • Executive reference

Worked with me since 2019. Can speak to how I scope, price and deliver, and how I treat the people I work with.

Working with me

- Clear, plain-language communication
- You plan directly with the person building it
- I stand behind my work: if something I built breaks, I fix it
- Local, U.S.-based, and here long after launch
- Predictable, straightforward pricing

Let's Build.

A curated front door for small brands, built one approved step at a time.
Say "go" by **Friday, October 9** and Discovery starts **Monday, October 12**.
First clickable prototype by October 16; full package and fixed build price by
October 23.

1

Reply "go"

I sign your confidentiality agreement and send the Discovery agreement.

2

Kickoff • Oct 12

60 minutes with you both, and your Technical Advisor if you like.
Share your documents and tool access.

3

Package • Oct 23

Everything from the Discovery slide, plus a fixed build price. You decide, with no obligation to build with me.

Questions first? [Book 20 minutes with me →](#)

Budget in mind? Tell me the number and I'll show you exactly what fits.

Gera Yeremin · 707.694.5624 · why57.com

Keep what works, test what is risky, and build only what is left.

CAPABILITY (your MVP ID)	RECOMMENDATION	WHY
Public pages and brand pages MVP-05	KEEP ON WIX	Your Wix site already does this well. It stays unless the test shows a gap.
Brand Partner area and admin MVP-01 to 04	TEST, THEN BUILD	2-step login, upload checks, role-based access and a review workflow. The test shows what Wix can carry.
Publish and expire schedule MVP-04	TEST	Stage C is 24 promotions every 24 hours: reliable, monitored jobs with alerts.
Directory links, clicks, reconciliation MVP-05, 10	SMALL CUSTOM PIECE	A first-party click log and statement import keep your data portable, not locked inside one site builder.
Consent record and data delivery MVP-07 to 09	SMALL CUSTOM PIECE	One ledger of who agreed to what, and an expiring download link per brand with a delivery receipt.
Giveaways MVP-06	BUY + INTEGRATE	ViralSweep, as you planned. Embed first, and the API if your launch rules need it.
CRM, email and invoicing	BUY + CONFIGURE	Zoho CRM Professional as planned, an email platform chosen with you, and Xero invoices after validation.
Security and privacy MVP-11	CONFIGURE	Separate admin credentials, MFA, least-privilege vendor access, CAPTCHA and audit evidence.
Later	DEFER	Member accounts, search, personalization, a partner dashboard, cross-network affiliate integrations and the Step 3 automations.

Technical approach: standard, widely used web technology; managed hosting and database; role-based access; daily backups; all code in your repository with documentation, so any independent reviewer can pick it up. An initial recommendation, not a prescribed stack: Discovery confirms each line, and every third-party tool is disclosed before you commit.

APPENDIX B • INTEGRATIONS • LAUNCH VS. LATER

Launch with embeds and imports. Connect by API once the evidence says so.

I dug into each tool's API so you know what integrating unlocks, and costs, before you spend a dollar on it.

TOOL	AT LAUNCH	LATER, BY API	ADDED COST
Giveaways ViralSweep	Each giveaway's widget on its brand page, styled to match your look.	One-tap entry across every giveaway · bonus entries, including the 5 for a Brand Partner opt-in · entry counts in brand reports. <i>Giveaways are still created in ViralSweep; its API can't create them.</i>	≈ \$3,000 build + plan upgrade ≈ \$170–200/mo. May be needed at launch for your bonus-entry rules; Discovery decides.
Affiliate platforms each brand's own	A tracked link per brand, a click log, and each platform's statement imported by CSV or entered by hand each month.	Automatic statement aggregation across the networks your brands actually use.	Quoted once your first wave shows which networks matter
Email	Signup form with separate consents; the morning email built from the day's published promotions.	Alerts tailored to each member's categories · last-chance reminders timed to each deal's end.	≈ \$1,500 build usually no plan change
CRM Zoho	The application form drops each brand into Zoho and Francene's inbox; approvals are recorded on the brand's Deal.	Two-way sync of brands, bookings and campaign results.	≈ \$1,200 build no plan change (Zoho CRM Professional includes API access)
Invoicing Xero	None during validation, since services are free. Afterward, Xero invoices with online payment.	Invoices created and tracked automatically per booking.	≈ \$1,000 build

Figures are estimates to plan around, confirmed in Discovery. We move giveaways to the API only if your launch rules or your entries prove it pays.

No surprises: what the range assumes, and how changes work.

Key assumptions

- Scope follows your MVP Definition Register (FF-004) and MVP Build Brief (FF-007)
- Launch starts at Stage A, 10 promotions a week, and grows by your stages; please confirm the launch target
- Business decisions within 2 business days; one design round plus one revision
- US Members, English only; you provide access to Wix, Zoho, ViralSweep and your email platform

Not in the build

- Checkout, purchase tracking, or your own cross-site conversion tracking
- Member logins, search, personalization, a partner dashboard
- Multi-network affiliate integrations and automated payout routing
- The Step 3 automations (quoted separately); copywriting, photography, legal review, tool subscriptions

What could move the price

- **Up:** the giveaway API needed at launch, Wix failing more of the test, extra services or brand-page templates, extra design rounds, data migration
- **Down:** Wix passing the test, fewer services at launch, manual report sends, starting at Stage A volume

Change control after approval

- Any change gets a one-page written request: what, why, cost and schedule impact
- Nothing proceeds until you approve it in writing
- Tweaks under an hour are absorbed, not billed
- Step 3 items are quoted separately, as fixed mini-scopes

Top risks, and how I handle them

- **Directory brands not affiliate-ready:** pick the first wave early and use your readiness checklist
- **Clicks without commissions:** reconcile monthly, as your FF-008 warns
- **Consent across four tools:** one ledger, checked before giveaway access
- **Brand content arrives late:** upload checks and a simple content checklist per brand
- **Email lands in spam:** sender authentication set up and warmed before launch
- **Holidays and approvals:** dates move week for week, and the plan already builds in the holidays

APPENDIX D • YOUR BRIEF, ANSWERED

Everything you asked a partner to include, point by point.

YOU ASKED FOR	MY ANSWER
Named lead, team, locations, roles	✓ Gera Yeremin, senior product and delivery lead who also builds it. Based in Sonoma County, CA. No offshore or subcontracted work.
Discovery approach, fee, timetable, deliverables	✓ Two weeks, Oct 12–23, \$3,500 fixed , half at the start and half on delivery. Deliverables are on the Discovery slide, written so your Technical Advisor can review them.
Buy / configure / integrate / custom / defer	✓ Appendix A. No prescribed stack; Discovery confirms each line, including the Wix test.
Build range, milestones, assumptions, exclusions, change control	✓ \$22,000–\$30,000 indicative , then one fixed price after Discovery, paid in two parts: half when the build starts and half when it's launch-ready. Assumptions, exclusions and change control are in Appendix C.
Material cost drivers	✓ Appendix C, both up and down, with the top risks.
Approval gate	✓ Nothing is built until you approve the Discovery package and the fixed price in writing. Step 3 is a separate decision after you have seen the results.
Ownership + handoff	✓ Code, repository, data, designs, configurations and documentation are Friendly Finch's from day one. Handoff session and runbook included. Third-party tools disclosed before you commit.
Independent technical review	✓ Welcome at any point: during Discovery, before build approval and before launch.
Post-launch support model	✓ Defects in delivered scope fixed free for 30 days. Optional Validation Care at \$450/mo, no minimum commitment , cancel anytime. Ad hoc at \$120/hr. Enhancements quoted as fixed mini-scopes.
